

Anchor Ridge Solutions is a service-disabled veteran-owned sole proprietorship supplying commercial software, subscriptions, and technology products to civilian federal agencies and California state and local government. As a certified California DVBE, purchases made through Anchor Ridge count toward agency small business and disabled veteran participation goals.

CORE COMPETENCIES

- **Digital accessibility & Section 508 compliance** — document remediation, web accessibility testing, and ADA Title II conformance tooling.
- **Digital permitting & licensing** — permit intake, plan review, and professional licensing platforms.
- **Government payments** — citizen-facing payment and billing platforms for utilities, fees, fines, and permits.
- **Records & public disclosure** — records management, retention, redaction, and public records request workflow software supporting FOIA and CPRA obligations.
- **Commodity technology supply** — COTS hardware and peripherals, TAA-compliant product lines.

DIFFERENTIATORS

- **Certified DVBE.** California agencies applying Anchor Ridge spend toward the 3% DVBE participation goal without additional documentation burden.
- **Set-aside eligible.** Certified California Small Business (Micro); SBA SDVOSB certification in process.
- **Owner-operated.** Quote requests and solicitation responses are handled directly by the owner — no account-team handoffs.
- **Focused catalog.** A deliberately narrow set of government software categories rather than a general-purpose reseller catalog.

PAST PERFORMANCE

Anchor Ridge Solutions was established in 2026 and is newly registered for government contracting. The firm has no prior contract awards to report. References and supplier authorization documentation are available on request.
